Safe Drive Stay Alive

Safe Drive Stay Alive came into our school on the 6th of November to present to all 5th years. The presentation consisted of how to be safe on the roads whether you are driving or just a passenger. Statistics were also included in the presentation, which was a shocking realization of how many young people are actually injured or killed in road traffic accidents. Running since 2002, Safe Drive Stay Alive is a Fife-wide annual road safety presentation which aims to increase young drivers' awareness of safe driving and the potential consequences of poor actions on the road. After a short presentation, a video was shown. It was a story about young people that got into a road traffic accident and the consequences after with some short clips of real-life responders sharing their experiences in their field. Discussions were held in PSE lessons after, so pupils could discuss their thoughts on the afternoon and the important messages to take away as we all think about or begin learning to drive.
