

Belonging • Experiences • Aspirations • Teamwork • Honesty

As part of Maths Week Scotland, Madras College hosted the Enterprising Maths Fife 2024 competition. This is an annual event which provides all Secondary schools in Fife with the opportunity to participate in a fun filled day, full of all things Maths, culminating in a fast-paced relay.

Teams from 17 schools across Fife took part, including our very own team from Beath. S4's Callum Garvie, Beau Hardie and S3's Alexis Dobbie and Roxy Easton did a fantastic job representing #teamBeath. They worked together to tackle the many challenges and even built a freestanding tower of 7 Columbus cubes!

Our team also had a fantastic result, placing second in the poster competition, with their take on the 'Maths Tales'.
