

# GP ROOM LEARNING LOWDOWN

BANKHEAD

PRIMARY SCHOOL

3rd May 2024

# THIS WEEK'S LEARNING NEWS

## *This week in GP Room.....*

- We started our week by recapping our weekend and having a check-in. We love hearing each others weekend news and what we got up to.
- In literacy, we practiced our spelling words daily in preparation for dictation on Friday and looked at commonly confused words within sentences.
- In numeracy, we continued with our fractions topic and looked at finding equivalent fractions.
- In gym, we have had lots of fun playing on the wall bars, PE equipment and got to play outside in the nice weather.
- In Science we continued our Human body topic and learned all about the importance of the lungs and how to keep them healthy. We reflected on the model we saw at the science centre last week and the difference between healthy lungs and lungs that have been scarred from smoking and other chemicals.
- P5 attended a Heptathlon at Stonelaw High school and participated in a variety of activities.
- In Health and Wellbeing we were learning about the do's and donts for medicine.

**Bankhead will SOAR!**

# ASK US ABOUT..

## Our topic

We looked at the lungs and how they take in oxygen from the air you breathe in and move it into your bloodstream, so that it gets to every part of your body. We looked at 2 diagrams similar to the ones we saw at the science centre and compared them. We focussed on how to keep our lungs healthy and completed 2 diagrams to show the difference.

## WHAT WAS CHALLENGING?

Some of us found our spelling words challenging this week. We had lots of practice and tried different strategies to help us learn/remember our words better including partner work, back spelling, roll the ball, rainbow writing and lots more. The hard work paid off as we all did fantastic in our dictation this week! Well done Room GP for having a growth mindset and for not giving up!

SUCCESS - OPPORTUNITY - ACTIVE -

# NEXT STEPS/TARGETS

Next we will be...

- Continuing to practice our spelling words.
- Starting a new focus for writing and generating ideas together as a class.
- Looking at a science experiment which demonstrates how easily germs can be spread.

## IMPORTANT INFORMATION

Next week....

We are off on Monday for a bank holiday.
