

NUMERACY

In maths we are planning to continue working on our times table knowledge as well as doing further work on subtraction. We will also be studying shape, measure and possibly money too.

ROOM 6

WHAT AN AMAZING TERM 1 WITH THE P3/4 BOYS AND GIRLS IN ROOM 6. BOTH MRS LAMONT AND MRS KERR ARE LOOKING FORWARD TO THE SECOND TERM IN THE 2023-24 SESSION.

OTHER SUBJECTS

In Science we are moving on from space to forces. We will look at push and pull toys, magnetism, air power and others – we are sure that the class will come up with more ideas!
For Health we are looking at being active, healthy food choices and respecting the ideas, opinions and values of others.

LITERACY

We are going to start off this term with a book study. We will be reading James and the Giant Peach by Roald Dahl and there will be lots of fun and informative activities to participate in as we develop a deeper understanding of the text. The book study will also link into our social studies topic on the weather and climate change. In literacy we will continue to practise our spelling, handwriting and writing skills.

ASSEMBLY

We loved our topic in term 1 on 'The Vikings' and presented fantastic solo talks on an area of our choice which interested us! We enjoyed doing this so much we voted to have our class assembly, in February, based on this topic.
