

The dogs are hiding behind this wall but just how many? Can you work out the fraction of dogs so you can complete the table and Pie Chart? (All parts of the pie chart need to be coloured, so the dogs' number is NOT zero.)

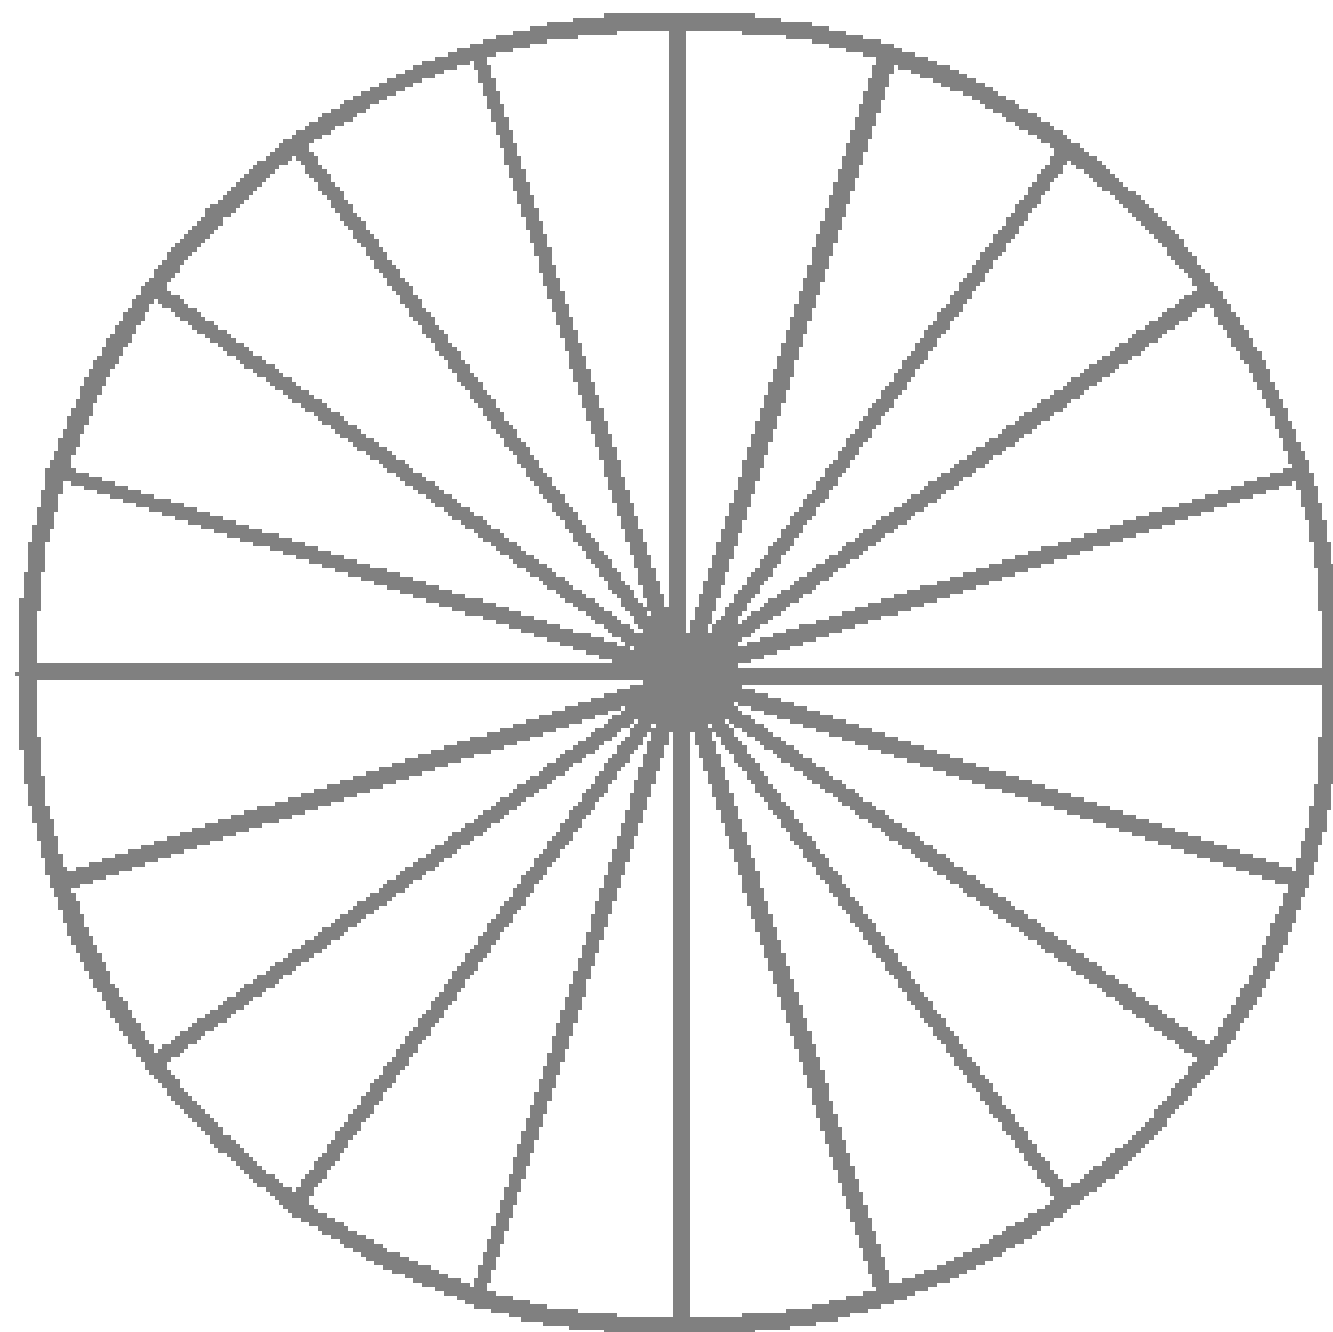

The previous page shows a group of pets - they represent **the whole**. Using your knowledge and understanding of data handling, produce a pie chart using the data, following instructions and take your time.

Instructions:

1. Complete the table.
2. Use a different colour for each pet and colour the pie chart using the information from your table.
3. Give the pie chart a title and a key.

Type of Pet	Fraction
bird	
cat	
dog	
guinea pig	
hamster	
horse	
llama	
tortoise	

Key:
