

Primary 6B Homework Term 1

<p>Literacy</p>		<p>Create a detailed drawing of a magical room! Write a paragraph to describe this room using descriptive language. Pay attention to detail. You might want to use similies to help you with your description.</p>	<p>Read, read, read! Choose a book to read at home (or your reading book). Choose your favourite page so far and explain why? What techniques does the author use to engage you with that specific page?</p>	<p>Let your imagination run wild! Create an imaginative story to share with the class. Engage us by using ambitious vocabulary throughout your writing!</p>
<p>Numeracy</p>		<p>Create a board game including addition and subtraction calculations. This can be played in class or at home.</p>	<p>Practise your timestables using Topmarks or Number Gym. Ensure you are challenging yourself to learn a new timestable or practising one that you find tricky.</p>	<p>Create your own multiplication square (google this if you are not sure what it is) to support you with division. This can be done on the computer by creating a graph or done by hand on paper. Keep this safe and we can use it in class.</p>
<p>STEAM (science, art, technology)</p>		<p>Use the BBC Bitesize website to find out about Forces, electricity and Waves! Watch some videos, take some notes and share your findings with the class.</p>	<p>Create a junk model of a roller coaster. Think carefully about the materials that you choose, do they offer support for the different twists and turns you might want to include?</p>	<p>Use YouTube to discover how to create some 3D pencil art. There are lots of different tutorials guiding you through steps to create a cool drawing! Bring them in and we can display them in the classroom!</p>
<p>ICT</p>		<p>Use the internet to research a famous Theme Park. Use Glow to create a PowerPoint or Sway to share your research.</p>	<p>Can you use an animation App to design your own ride for a Fairground? Free Apps for creating animations: <ul style="list-style-type: none"> • Stopmotion Studio • I Can Animate </p>	<p>Practise your typing skills by choosing a page from a favourite novel. Use both hands on the keyboard. This skill will support you in future life when using the computer to carry out tasks in high school, college, university & work</p>
<p>Health & Wellbeing</p>		<p>Perform an act of kindness each day for a week. How did this impact on your week? Record your findings and share with the class.</p>	<p>Explore children's rights using the UNCRC website. Can you identify a news story where children's rights weren't being met? How did this make you feel?</p>	<p>Create a fitness routine to do at home and get your family/friends involved. Make sure you feel challenged throughout this!</p>
