

Primary 6a/7b Homework Grid (Term 1)

Literacy		<p>Create a new front cover for our class novel (Holes), with regards to what we have read so far. Remember to include all essential aspects of a front cover.</p>	<p>Write a character description from our class novel (Holes) paying particular attention to VCOP. Think about how to use your VCOP to uplevel your writing.</p>	<p>Read, read, read! Choose a book to read at home (or your reading book). Choose your favourite page so far and explain why? What techniques does the author use to engage you with that specific page?</p>
Numeracy		<p>Create a board game including addition and subtraction calculations. This can be played in class or at home.</p>	<p>Practise your timestables using Topmarks or Number Gym. Ensure you are challenging yourself to learn a new timestable or practising one that you find tricky.</p>	<p>Create your own multiplication square (google this if you are not sure what it is) to support you with division. This can be done on the computer by creating a graph or done by hand on paper. Keep this safe and we can use it in class.</p>
STEAM (science, art, technology)		<p>Use the BBC Bitesize website to find out about Forces, electricity and Waves! Watch some videos, take some notes and share your findings with the class.</p>	<p>Create an invention to help solve a problem in society. Write about your invention and draw a detailed, labelled drawing of this.</p>	<p>Use YouTube to discover how to create some 3D pencil art. There are lots of different tutorials guiding you through steps to create a cool drawing! Bring them in and we can display them in the classroom!</p>
ICT		<p>Create a powerpoint presentation to share with the class. This can be based on a topic of your choice. Focus on a balance between information and images on each slide.</p>	<p>Download an App to your launchpad on GLOW. This App must help you with numeracy and the four operations (addition, subtraction, multiplication and division). If you find a super helpful one please share it with the class.</p>	<p>Practise your typing skills by choosing a page from a favourite novel/class novel/reading book. Use both hands on the keyboard. This skill will support you in future life when using the computer to carry out tasks in upper school, high school, college, university and work.</p>
Health & Wellbeing		<p>Perform an act of kindness each day for a week. How did this impact on your week? Record your findings and share with the class.</p>	<p>Explore children's rights using the UNCRC website. Can you identify a news story where children's rights weren't being met? How did this make you feel?</p>	<p>Create a fitness routine to do at home and get your family/friends involved. Make sure you feel challenged throughout this!</p>
