

**Public Meeting of the Fossoway Community Development Trust**

**When:** Wednesday 24 November 2021 at 7.30pm

**Where:** Elizabeth Wilkie Hall at Fossoway Church in Crook of Devon

**Some of the ideas that have been suggested so far that the CDT could work on:**

<b>What do you think Fossoway CDT should tackle first?</b>
Activities for older children and teens etc, such as a pump track for bikes
Some sort of cycling facilities in the park.
Build a bike pump track
Footbridge over the River Devon
Make a flume park
Better Internet in the Aldie Road it is very slow and Openreach do not seem interested and yet there are many businesses and families in that road that need fast internet.
Youth activity projects eg cycle track, additional playground equipment. Improvement of junction of A977 and the road leading to the school. 20mph speed limit through the village
New bridge you propose sounds great!
Footpath network signage and information
Stone walls along Naemoor road need re-pointing and copes reinstated.
Purchasing and re foresting of local land and introducing rights of way through (but with the priority being on creating habitats).
The bridge over the Devon. Could the CDT consider a business centre/shared workspace. As office work is changing from office to home working, having a place for locals to meet up and complete work in a shared environment would in my mind help bond the community and reduce work for home fatigue.
Toilets and additional court for the tennis club.
I don't think reconstructing the bridge that was washed away is the best thing. There are still two bridges across the water that adequately serve the purpose. I would prefer to see the current footpaths around the village having a little more attention as some are becoming quite overgrown and the surfaces are being broken up, often by bikes, and therefore are holding water and becoming very muddy, which may decrease the usage.

Better Internet into the Aldie Road, if it gets any slower we may have to invest in some pigeons.

Would massively welcome the cycle path from Crook that stops at the Aldie road to be completed, so that it runs through to Kinross as originally planned.

The scrub trees at the park car park were never supposed to be there. That was a flat area for a shed, pavilion or container. They should go into a shredder.

Foot route to Kinross; Cycle tracks / route from Stirling; Bridge - make sure it's accessible and consider parking; Broadband
