

## RESPONSIBILITIES

The **Head Teacher** has overall responsibility for the development, organisation, implementation and monitoring and evaluation of an effective programme for Enterprise in Education.

**All members of staff** have a responsibility to be aware of the recommendations of Determined to Succeed and will reflect upon learning and teaching in their own classrooms in the light of these.

They should strive to:

- Consider their role in promoting positive attitudes and developing skills for life in young people by developing their own confidence, self-esteem, a determination to succeed – a 'Can do.....will do' attitude.
- Promote a responsible attitude to learning in young people.
- Promote collaborative working approaches where appropriate.
- Be aware of and highlight core skills which can be used across the curriculum
- Monitor and evaluate pupil performance. Giving feedback to pupils.
- Encourage pupil self-evaluation and pupil responsibility for their own learning.

## RESPONSIBILITIES (cont)

**Pupils** are encouraged to take responsibility for their own learning.

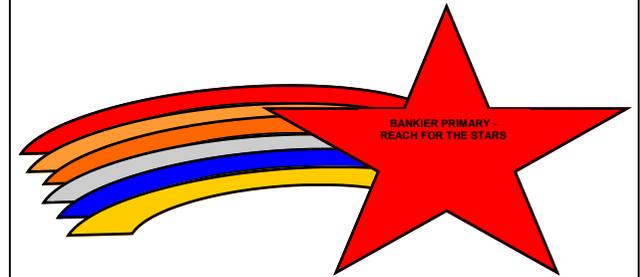

They will strive to:

- Relate what they are learning to its relevance in their lives.
- Use self-evaluation in such a way to allow them to move forward in their learning.
- Take part in opportunities which allow them to voice their opinions, be listened to and know their opinions are valued.
- Understand they can affect policies, decisions and opinions through such participation e.g. Pupil Councils.

Working together!

## RATIONALE

Work, in the widest sense of the word, is integral to human life and takes a variety of forms. One of the main purposes of education is to prepare young people for the world of work. Young people need to leave school with the knowledge, understanding, creativity and confidence to be the wealth creators of tomorrow. The ever-changing demands of working life make it necessary for flexibility and a commitment to lifelong learning. Enterprise in Education (EiE) covers learning across the curriculum in employability skills, career education, and aspects of citizenship, personal and social development and in development of the core skills.

EiE provides 'real life' contexts for teaching and learning and makes it more relevant. School will provide opportunities for our young people to:

- Develop enterprising attitudes and skills through learning and teaching across the whole curriculum,
- Experience and develop understanding of the world of work in all its diversity, including entrepreneurial activity and self-employment,
- Participate in enterprise activities,
- Enjoy appropriately focused career education.

## AIMS

It is important to provide pupils with a wide range of experiences which will increase their self-confidence and motivation, instilling a belief that they can succeed in whatever they choose.

**Here are some of our aims:**

- To work in partnership with Falkirk Council and local businesses to provide opportunities for pupils and staff to experience and benefit from enterprise and world of work events.
- To develop a greater understanding, by pupils, of the role of the business and its impact on the national and local economy.
- To provide all pupils with a realistic understanding of the world of work so they are better equipped to take advantage and adapt to changing circumstances in employment.
- To ensure that a wide range of activities are delivered within the school allowing our pupils to acquire and develop entrepreneurial and core skills.
- To promote a culture of enterprise and creativity to enable all pupils to contribute effectively to their own skills development.
- To work with parents and provide opportunities for them to use their skills and expertise to contribute towards the education of their child.

## HOW WILL DELIVER ENTERPRISE IN EDUCATION?

**Teachers** will plan to make use of a wide variety of teaching methods and provide opportunities for pupils, both inside and beyond the classroom.

Pupils will be actively encouraged to become independent learners and develop enterprise skills.

Creativity and thinking skills will be promoted.

**Pupils** will be given the opportunity to participate in activities that foster development of the core skills of communication, numeracy, working with others, using ICT, problem solving and personal and social development.
