Setting up Notification from the App

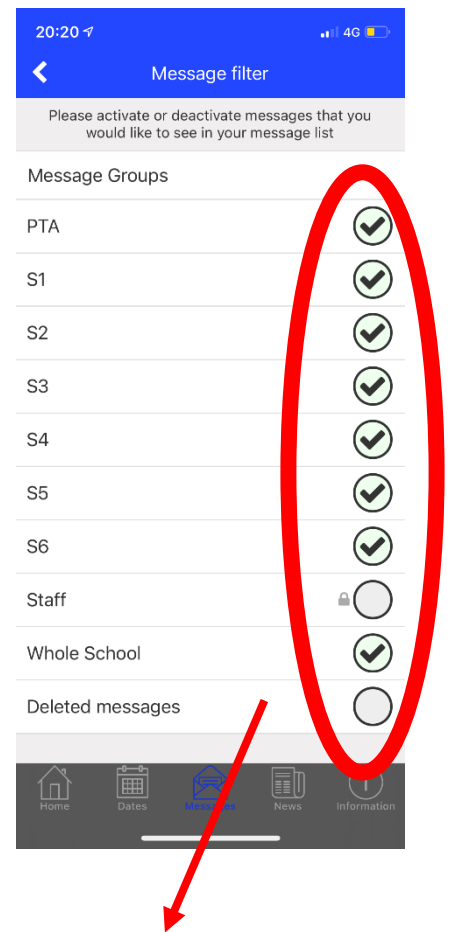

The good thing about our School App is that you don't need to worry about receiving notifications that aren't relevant to you or your children. You can customise the notifications that land on your home screen so that you never miss any importance announcements or news from Beath.

1. Select the Messages Tab from the menu along the bottom of your screen.

2. Click on the filter option in the top right hand corner of your screen.

3. Select the Year Groups which you wish to receive notifications from as well as 'Whole School'.
