

Room 3 Primary 2

The boys and girls in Room 3 have settled into the new routines of primary 2 so well. Everyone has been working extremely hard this term. We have been very busy working together to revise previous work and learn lots of new things. Miss McNeill is one very proud teacher!

Literacy

In Literacy, we have been learning new phonemes and common words. To help us to spell our tricky words we have used a range of different spelling strategies. Our favourite strategy to use so far has been to find the tricky part of the word. We have also read a lot of new stories this term and have enjoyed reading aloud to our peers.

Numeracy

In Numeracy, the boys and girls in Room 3 have been exploring different methods to add and subtract numbers within 20. We now know what method we enjoy using and what works best for us. We are now beginning to work with numbers to 100. In Maths, we have been focusing on symmetry and shape. We loved creating our own 2D Castles.

Other Curricular Areas

Our topic this term was 'Knights and Castles'. We enjoyed learning about the different parts of a castle and exploring who would live and work in one. We had great fun role playing as Knights and enjoyed creating our own 'coats of arms'. In Science, we are beginning to learn about Living things. We have enjoyed working collaboratively and taking our learning outside!
